Deddy Mulyana: 'Anyone can play on the same team' EDIT : read this as i cant find the ubuntu 14.04.4 32-bit version. When i try to install it from the main menu, it says : The file '/home/wpc/Downloads/ILMs_1.2.zip' is not marked as executable. If this was downloaded or copied from an untrusted source, it may be dangerous to run. For more details, read about the executable bit. How do I mark this file as executable? If that doesn't work, I need the ubuntu 32-bit version. A: You need to do the following: Open a terminal (CTRL + ALT + T). Type the following: chmod +x /home/wpc/Downloads/ILMs_1.2.zip. This will mark the file as executable, allowing you to run it. sudo apt-get remove ilms sudo apt-get autoremove sudo apt-get update sudo apt-get install ilms I had the exact same problem you did, and I used those commands. A: Yes, Ubuntu 4.10.1 is really outdated, so you should upgrade it to 14.04. In ubuntu 14.04.4 there is no 32bit version, only 32 and 64bit version. A lot of individuals like to spend as much money as possible on hot tubs, but they are often not the most efficient. Some people believe that the key to a great hot tub is to spend as much money as possible. However, water is still the most important aspect, so you should consider the price of your hot tub versus its quality. Other important points to consider are the size and the amount of water that it takes to fill. TIP! The health and fitness of your hot tub are crucial when shopping for your hot tub. Select a unit that makes you feel good about yourself. Doing research into hot tubs is vital. You need
